

Quickest way to add an item is
to enter edit mode.

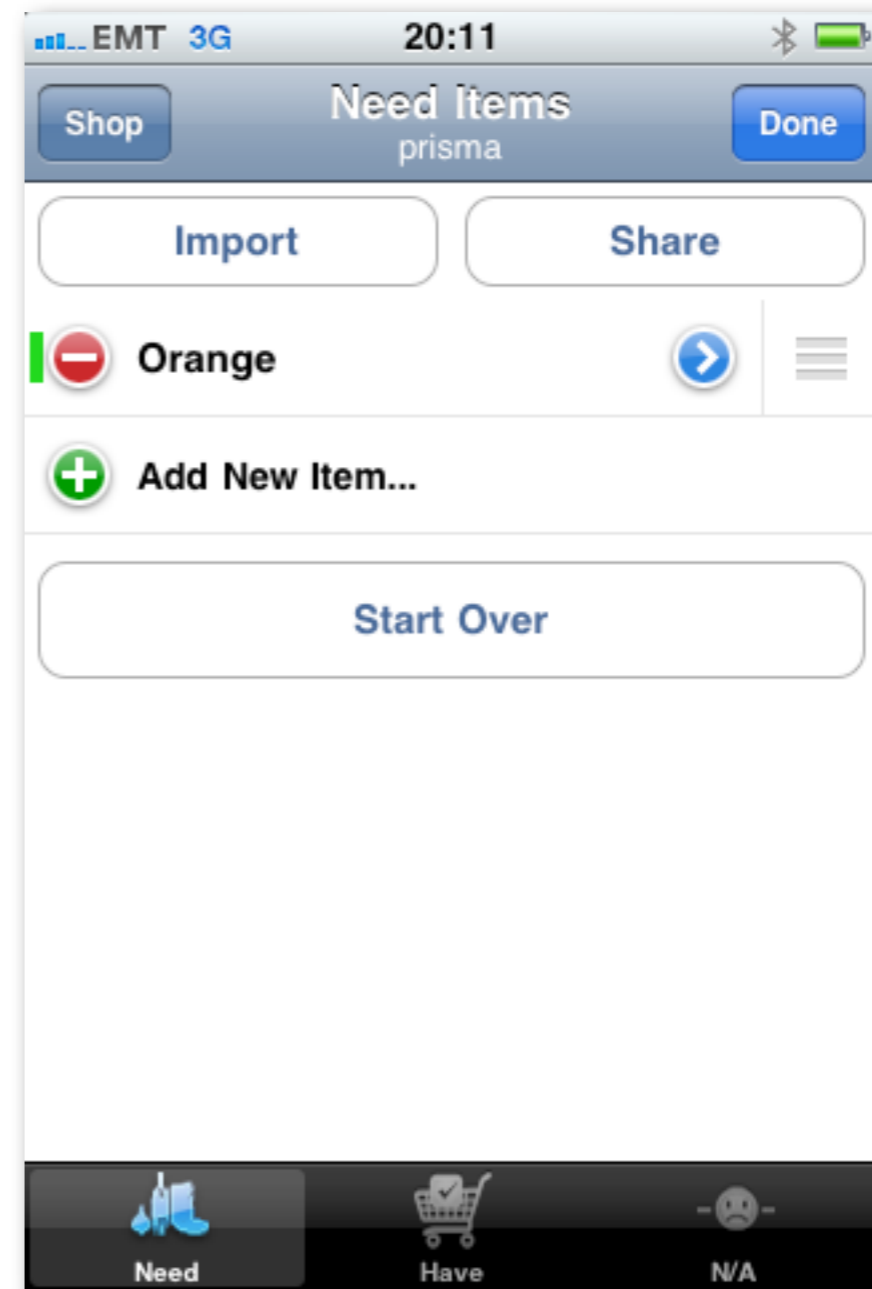

You can always add item by tapping on the (+) icon at the end of the current list.

- When you first purchase the app there are no known items.
- You can add new items by typing in the search field and tapping (+) when you've spelt out the word.
- If you find a match, you can add the item by tapping on its row.

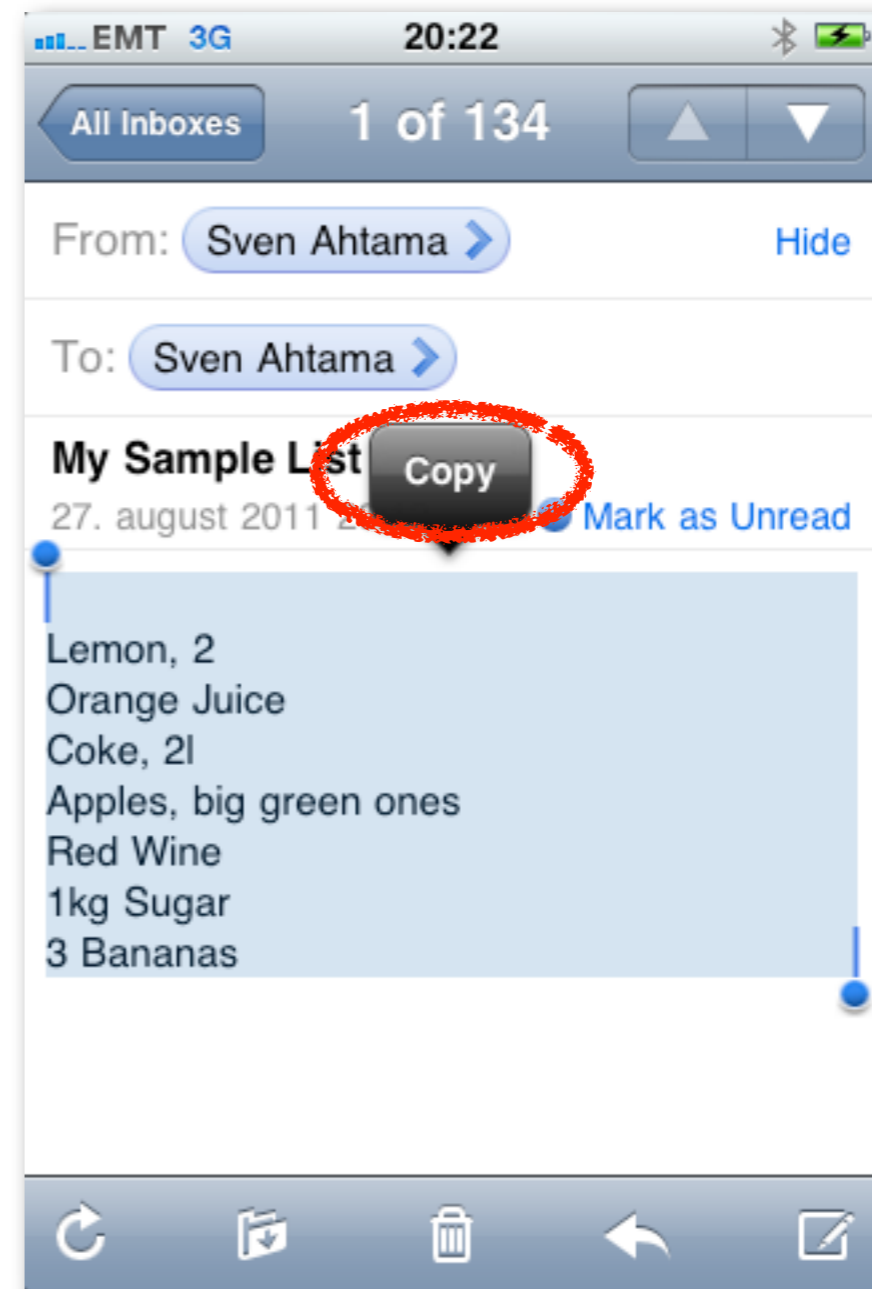

Once you are back on the list view you can add more items by tapping on the (+) icon.

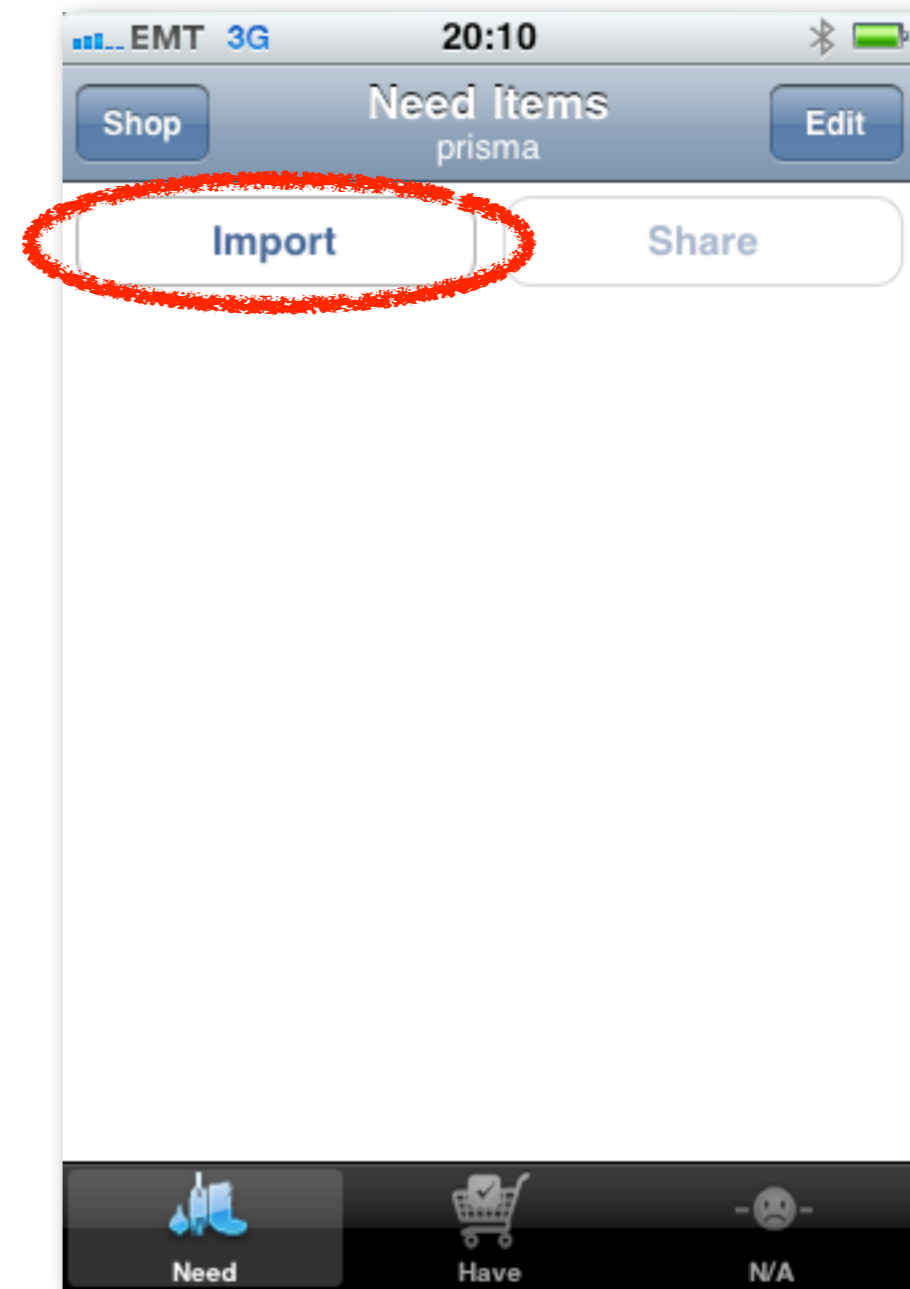

Our team's favorite way however is to make the list on your Mac or PC and send it to yourself by mail. Or you can have someone else do it.

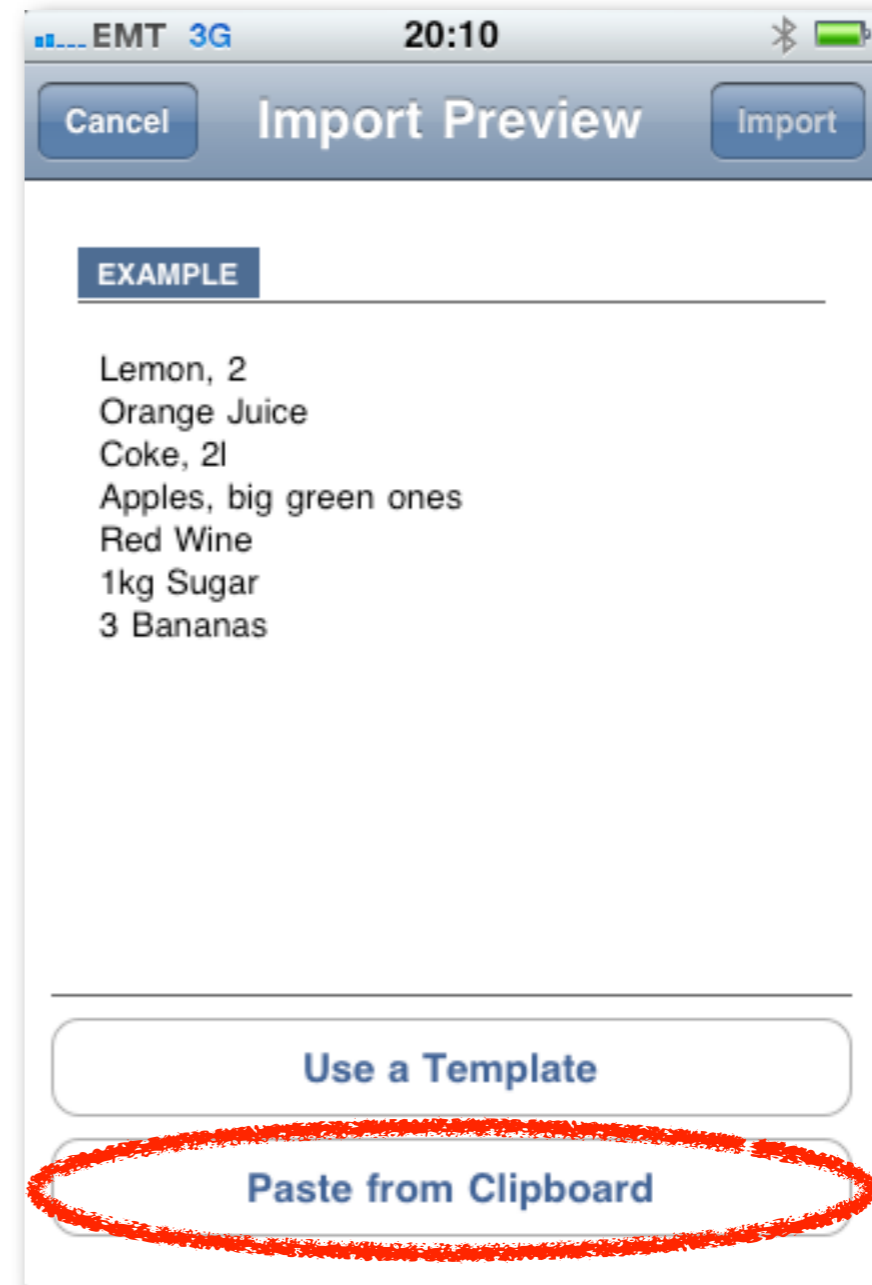

Just go to your Mail App and copy it all.

Launch iShopStop and tap **Import** in the table header.

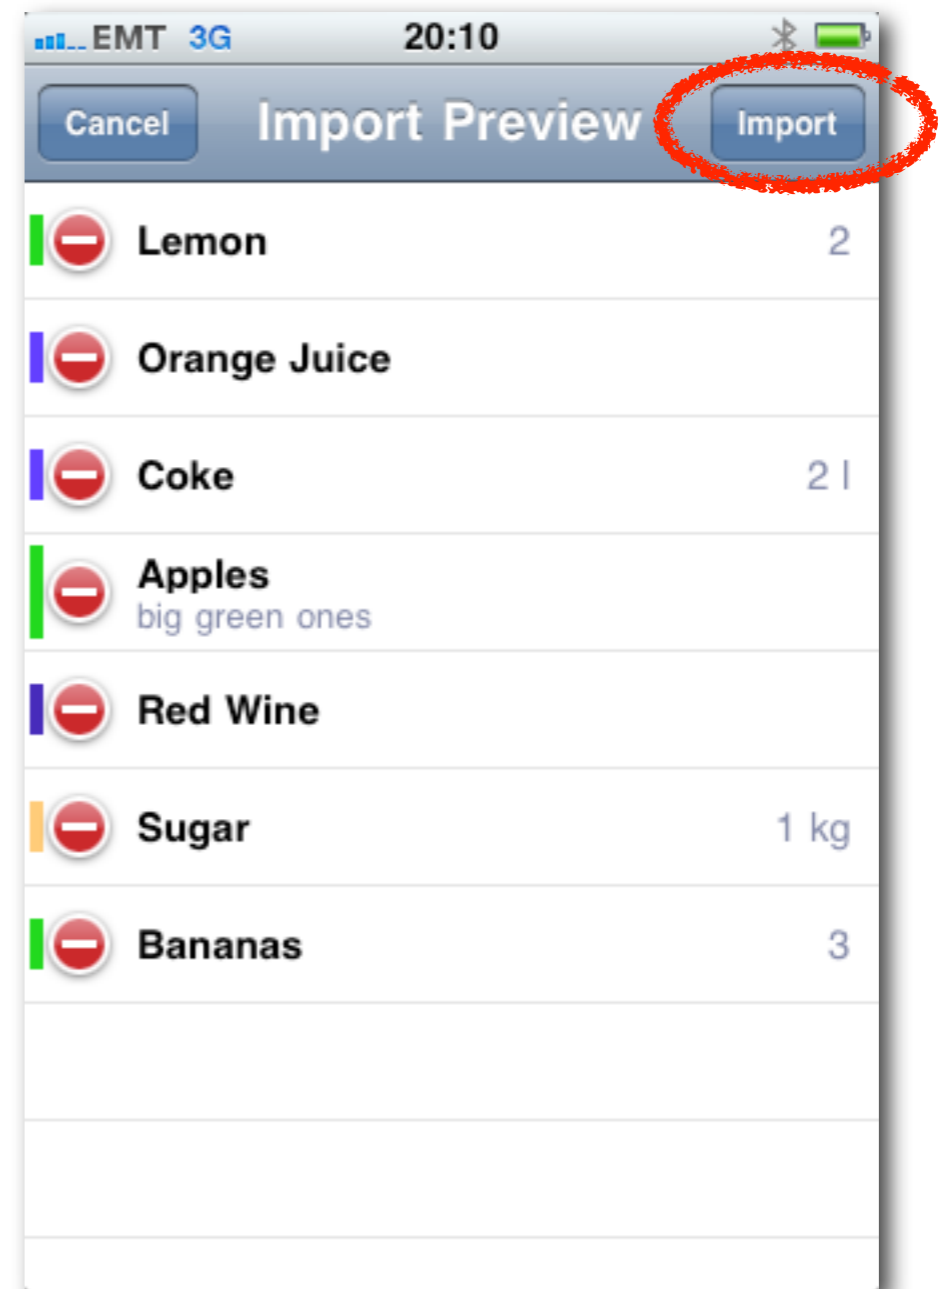

Tap **Paste from Clipboard**
to paste your shopping list for
import.

You'll have a chance to preview the list.

Once you are happy with it, tap **Import**.

Feel free to adjust any quantities or move items around between aisles.

iShopStop will remember it next time you need the same items!
